ARPS/Circular/2021-22/015

Elimination of Single-use Plastic Items in the School Campus

Dear parents,

Single-use plastic drastically impacts the environment in a harmful way. These are mostly dumped after usage, on the landfill sites and choke the water supply and drainage system, thereby damaging the environment due to its non-biodegradability.

As a part of the efforts to eliminate the use of single use plastic in our school, please be informed that the following types of plastic items cannot be used within school premises or for any school functions, w.e.f 10th October 2021:

- Table-top plastic sheets
- Single use plastic carry bags
- Use and throw plastic cups and plates
- Single-use drinking water bottles
- Plastic spoons and forks

Let us all ensure that the school campus is kept free of the above forms of plastic and adopt the strategy of 6Rs (Reduce, Reuse, Recycle, Recover, Redesign and Remanufacture).

Regards,

Principal

Ms. Anitha George
